

Performance Testing

Date	01 October 2026
Team ID	SWTID-2026-8742
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Step 1: Testing Overview

Testing Tool Used	ServiceNow Personal Developer Instance (PDI)
Type of Testing	Functional Performance / Response Testing
Target Module / API	Incident Form, Incident List, UI Policies and Client Scripts
Test Environment	ServiceNow Personal Developer Instance
Test Date	25 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (min)	Expected Outcome
1	Test Mandatory Enforcement – Set Impact to High, leave Assigned To empty, and attempt to submit the Incident.	1	5	Incident should not be saved and an error message should indicate that Assigned To is required.
2	Test Successful Save – Set Impact to High, fill the Assigned To field, and submit the Incident.	1	5	Incident should be saved successfully without an error.
3	Reverse Condition Test – Change Impact from High to Medium and check the configured field behaviour.	1	5	Assigned To should no longer be mandatory and Urgency should become editable.

4	Test List Edit Blocking – Attempt to change State directly from the Incident list.	1	5	An alert should appear and the State value should remain unchanged.
5	Test Form-Based Update – Open the Incident form, change the State, and click Update.	1	5	The State change should be saved successfully through the Incident form.

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	Immediate response under normal use	Within a few seconds	Pass	Client-side configurations responded during testing.
2	Response Time (Max)	No noticeable delay	Within a few seconds	Pass	No significant delay was observed during testing.
3	Throughput (Req/sec)	Not applicable	Not measured	N/A	No load-testing tool was used.
4	Error Rate	< 1%	No unexpected errors observed	Pass	Configured validation behaved as expected.
5	CPU Utilization	Not measured	Not measured	N/A	CPU utilization was not measured in the PDI.
6	Memory Utilization	Not measured	Not measured	N/A	Memory utilization was not measured in the PDI.

Step 4: Observations & Analysis

The five test scenarios were performed to verify the behaviour of the implemented UI Policies and Client Scripts.

The **Mandatory Enforcement Test** confirmed that a High Impact Incident cannot be submitted when the Assigned To field is empty.

The **Successful Save Test** confirmed that the Incident can be submitted successfully when the required Assigned To information is provided.

The **Reverse Condition Test** confirmed that the UI Policy restrictions are reversed when Impact is changed from High to Medium.

The **List Edit Blocking Test** confirmed that direct State changes through the Incident list are prevented.

The **Form-Based Update Test** confirmed that State changes can still be performed successfully through the Incident form.

Overall, the configured Client Scripts and UI Policies responded correctly during normal testing, with no significant delay or unexpected errors observed.

Step 5: Screenshots / Evidence

1. Mandatory Enforcement :

The screenshot displays the ServiceNow 'Incident - Create INC0010005' form. At the top, a blue notification bar states 'Urgency set to High for High impact incident.' Below this, a red error bar indicates 'The following mandatory fields are not filled in: Short description, Assignment group'. The form fields are organized into two columns. The left column includes 'Number' (INC0010005), '* Caller' (Abel Tuter), 'Category' (Inquiry / Help), 'Subcategory' (-- None --), 'Service', 'Service offering', and 'Configuration item'. The right column includes 'Channel' (-- None --), 'State' (New), 'Impact' (1 - High), 'Urgency' (1 - High), 'Priority' (1 - Critical), '* Assignment group' (CAB Approval), and 'Assigned to'. The 'Assigned to' field is empty, and a red tooltip message states 'Assigned To is mandatory for High impact incidents.' The 'Short description' field at the bottom contains the text 'Hii'.

2. Successful Save :
