

Project Executable Files

Date	01 October 2026
Team ID	SWTID-2026-8742
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete project configuration and Client Script source code	Yes
2	README / Setup Guide	Yes
3	Project configuration details and implementation documentation	Yes
4	Test results and screenshots	Yes
5	Project demonstration video	Yes

Step 2: File / Folder Structure

The project consists of the following configuration components implemented in the ServiceNow Personal Developer Instance:

Implement Client Script & UI Policy (Incident)

|

| — UI Policies

| | — High Impact Control

|

| — UI Policy Actions

| | — Urgency Field Control

|

| — Client Scripts

| | — Auto Set Urgency

| | — Assigned To Validation

	└─ State Change Restriction
	└─ Incident Table
	└─ Incident Records
	└─ Testing
	└─ Mandatory Enforcement Test
	└─ Successful Save Test
	└─ Reverse Condition Test
	└─ List Edit Blocking Test
	└─ Form-Based Update Test
	└─ Documentation
	└─ Project Documentation
	└─ Testing Documentation
	└─ Screenshots / Evidence

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	ServiceNow Personal Developer Instance
Login Credentials (Demo)	ServiceNow PDI account
Platform / Hosting Provider	ServiceNow
Repository Link	https://github.com/vk423877-cvk/-TN-Skills-Implement-Client-Script-UI-Policy-Incident--ServiceNow-

Demo Video Link	https://drive.google.com/file/d/1omJTTbercKrx_45N5TWU_qUPLPrLYVCU/view?usp=drivesdk
------------------------	---

Step 4: Run Instructions

1. Open the **ServiceNow Personal Developer Instance (PDI)**.
2. Log in to the ServiceNow instance.
3. Navigate to the **Incident** module.
4. Open an existing Incident or create a new Incident.
5. Set the **Impact** field to **High**.
6. Verify that the **High Impact Control** UI Policy is applied.
7. Verify the configured **Urgency** field behaviour.
8. Change the Impact field to High and verify that Urgency is automatically updated.
9. Leave **Assigned To** empty and attempt to submit the High Impact Incident.
10. Verify that submission is prevented and the validation message is displayed.
11. Change Impact from High to Medium and verify that the UI Policy restrictions are reversed.
12. Open the Incident list and attempt to change the **State** directly.
13. Verify that the State change is blocked by the Client Script.
14. Open the Incident form and change the State through the form.
15. Click **Update** and verify that the State change is saved successfully.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The solution requires access to a ServiceNow Personal Developer Instance.	Use an active ServiceNow PDI for demonstration and testing.
2	The solution is specifically implemented for the ServiceNow Incident table.	Perform the demonstration using Incident records.

3	The configuration is stored within the ServiceNow platform rather than as a standalone executable application.	Demonstrate the UI Policies and Client Scripts directly within the ServiceNow instance.
