

Code - Layout, Readability and Reusability

Date	01 October 2026
Team ID	SWTID-2026-8742
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Code Layout Checklist

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing and indentation are used throughout the JavaScript code.	Yes	The Client Scripts use consistent indentation and formatting.
2	Proper File Structure	Configuration elements and scripts are logically organized within ServiceNow.	Yes	Client Scripts and UI Policies are separately configured in ServiceNow.
3	Meaningful Variable Names	Variables reflect their purpose clearly.	Yes	Variables such as newValue and assigned_to clearly indicate their purpose.
4	Function / Method Names	Functions are descriptively named according to their purpose.	Yes	Functions such as onChange() and onSubmit() clearly identify their execution type.
5	Code Comments	Comments explain important sections of the code.	Partial	The scripts are short and self-explanatory; additional comments can be added where required.
6	Modular Design	Code is separated into appropriate functions or configuration components.	Yes	Different behaviours are implemented using separate Client Scripts and UI Policies.

7	No Redundant Code	Duplicate or unnecessary code is avoided.	Yes	Each script performs a specific function without unnecessary duplication.
8	Error Handling	Errors and invalid conditions are handled appropriately.	Yes	The onSubmit script prevents invalid submission and displays an error message.

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	High Impact Control UI Policy	ServiceNow UI Policy	Incident form	High
2	Urgency UI Policy Action	ServiceNow UI Policy Action	Incident form	High
3	Auto Set Urgency Client Script	JavaScript / ServiceNow Client Script	Incident form	Medium
4	Assigned To Validation Client Script	JavaScript / ServiceNow Client Script	Incident submission	Medium
5	State List Edit Control Client Script	JavaScript / ServiceNow Client Script	Incident list	Medium

Overall Code Quality Assessment

Aspect	Rating (1–5)	Comments
Code Layout & Structure	5	Client Scripts and UI Policies are organized according to their specific functions.
Readability	5	The scripts are short, clearly structured, and use meaningful names.
Reusability	4	The configurations can be adapted for similar Incident field-control requirements.

Documentation / Comments	4	Configuration names and script purposes are clear; additional comments can be added when required.
Overall Score	4.5 / 5	The implementation is organized, readable, and suitable for maintaining the configured Incident behaviours.
