

Coding & Solution

Date	01 October 2026
Team ID	SWTID-2026-8742
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	https://github.com/vk423877-cvk/-TN-Skills-Implement-Client-Script-UI-Policy-Incident--ServiceNow
Programming Language(s)	JavaScript
Framework(s) Used	ServiceNow Platform
Key Features Implemented	High Impact Control UI Policy; Urgency UI Policy Action; automatic Urgency update using onChange Client Script; Assigned To validation using onSubmit Client Script; State change restriction using onCellEdit Client Script; testing of configured behaviours.
Pending / Incomplete Features	No major features pending. The planned Client Scripts and UI Policies have been implemented and tested.
Setup / Run Instructions	Open a ServiceNow Personal Developer Instance (PDI), access the Incident table, and configure or verify the required UI Policies and Client Scripts. Open Incident records to test the configured behaviours.

Code Quality Checklist

S.No	Criteria	Status
1	Code is modular and organized into functions / configuration components	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes

5	The application/configuration runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments

The solution uses ServiceNow Client Scripts and UI Policies to provide dynamic Incident field control, automatic value updates, validation, and controlled State modification. The implementation was tested under different Incident conditions to verify the expected behaviour.
