

Solution Architecture

Date	01 October 2026
Team ID	SWTID-2026-8742
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Solution Architecture Diagram

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the interface through which users create, view, and update Incident records.	ServiceNow Incident Form, ServiceNow Incident List
Application Layer	Processes Incident interactions and applies the configured field controls and validation rules.	ServiceNow Platform
UI Policies	Dynamically control Incident fields based on conditions such as Impact = High.	ServiceNow UI Policies
Client Scripts	Perform client-side validation, automatic field updates, and control list editing behaviour.	JavaScript, ServiceNow Client Scripts
Data Layer	Stores Incident information and updated Incident records.	ServiceNow Database / Incident Table
