

Customer Journey Map

Date	01 October 2026
Team ID	SWTID-2026-8742
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Phase of Journey

Stage 1 – Create Incident

Stage 2 – Enter and Update Incident Details

Stage 3 – Submit and Manage Incident

1. Actions – What does the customer do?

Stage 1

- Opens the Incident form.
- Enters the required Incident details.
- Selects the Impact value.

Stage 2

- Selects High Impact when required.
- Reviews the Urgency field.
- Enters the Assigned To user.

Stage 3

- Attempts to submit the Incident.
 - Updates the Incident when required.
 - Manages the State of the Incident.
-

2. Touchpoint – What part of the service do they interact with?

Stage 1

- ServiceNow Incident module.

- Incident creation form.
- Incident fields.

Stage 2

- Impact field.
- Urgency field.
- Assigned To field.

Stage 3

- Submit/Update button.
 - Incident form.
 - Incident list view and State field.
-

3. Customer Thought – What is the customer thinking?

Stage 1

- “I need to create an Incident.”
- “I need to enter the correct details.”
- “Which Impact level should I select?”

Stage 2

- “What happens when I select High Impact?”
- “Why did the Urgency value change?”
- “Do I need to assign someone to this Incident?”

Stage 3

- “Can I submit this Incident correctly?”
 - “Why can't I change State directly from the list?”
 - “I can update the Incident through the form.”
-

4. Customer Feeling – What is the customer feeling?

Stage 1

- Neutral
- Focused

- Slightly uncertain

Stage 2

- Curious
- Guided
- More confident

Stage 3

- Assured
- Controlled
- Confident that the Incident is validated

5. Process Ownership – Who is in the lead on this?

Stage 1: Incident User / ServiceNow System

Stage 2: Incident User / UI Policy / Client Script

Stage 3: Incident User / Client Script / ServiceNow System

6. Opportunities – How can we improve this stage?

Stage 1

- Provide clear Incident field instructions.
- Automatically control fields based on Impact.
- Reduce user confusion during Incident creation.

Stage 2

- Automatically set Urgency for High Impact Incidents.
- Make important fields mandatory when required.
- Provide clear validation messages.

Stage 3

- Prevent incomplete Incident submission.
- Prevent unwanted State changes through list editing.
- Allow valid changes through the Incident form.
