

Scalability & Future Plan

Date	01 October 2026
Team ID	SWTID-2026-8742
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	1 Mark

Current System Limitations

S.No	Limitation	Impact	Priority to Address
1	The current solution is implemented specifically for the ServiceNow Incident table.	The configured behaviours cannot be directly applied to other modules without additional configuration.	Medium
2	The project currently focuses on a limited set of Incident field behaviours.	More complex Incident management requirements may require additional Client Scripts and UI Policies.	Medium
3	The solution is implemented in a ServiceNow Personal Developer Instance.	Availability and demonstration depend on access to the ServiceNow instance.	Low

Scalability Plan

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Designed and tested for normal Incident form usage.	The configuration can be optimized and extended for larger numbers of Incident users.
2	Data Storage	Incident data is stored and managed by ServiceNow.	Use ServiceNow's existing database and data-management capabilities as Incident data grows.
3	Performance	Client Scripts and UI Policies are tested under normal usage conditions.	Optimize scripts and conditions to reduce unnecessary client-side processing.

4	Security	The project operates within ServiceNow's existing access and authentication system.	Add appropriate roles, permissions, and additional validation rules when the solution is expanded.
---	-----------------	---	--

Future Roadmap

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Extend Client Scripts and UI Policies to additional Incident fields and conditions.	Future Enhancement	Provides more comprehensive dynamic Incident form control.
Phase 3	Extend the solution to other ServiceNow modules such as Problem or Change Management.	Future Enhancement	Increases the applicability of the solution across the ServiceNow platform.
Phase 4	Add advanced validation, automation, reporting, and notification capabilities.	Future Enhancement	Provides a more comprehensive and automated Incident management solution.
